

Vaibhav Pattewar

Genesys Cloud CX Engineer | Infrastructure Automation

Hyderabad, India | +91 9121923012 | pattewarvaibhav02@gmail.com | linkedin.com/in/vaibhav0803 | github.com/Vaibhav0832 | NexCX.in

Professional Summary

Genesys Cloud CX Engineer with experience in enterprise contact center operations, IVR development, SIP telephony, infrastructure automation, and production support. Skilled in troubleshooting complex issues, optimizing Genesys Cloud environments, and collaborating with cross-functional teams to deliver reliable customer experience solutions.

Technical Skills

Contact Center Technologies: Genesys Cloud CX, Genesys Architect, IVR Design, SIP Telephony, ACD & Skills-Based Routing, Outbound Campaigns (Preview, Progressive), Data Actions, CRM Integration & Screen Pop

Automation & Infrastructure: PowerShell Scripting, Windows Server, Active Directory, REST APIs, Webhooks, JSON, Production Troubleshooting, Root Cause Analysis, Monitoring & Alerting

Development & Tools: HTML, CSS, JavaScript, Git, GitHub, AI Integration, Prompt Engineering

Professional Experience

Genesys Cloud CX Engineer — CS Infocomm (Executive, Infrastructure Services)

Aug 2025 – Present

Project: Indian Bank | Client: Teleperformance | Chennai & Mohali, India

- Administer end-to-end Genesys Cloud CX operations for a 500-agent, dual-site deployment supporting high-volume inbound and outbound banking interactions for one of India's largest public sector banks.
- Design and maintain large-scale IVR call flows in Genesys Architect for banking campaigns, supporting millions of customer interactions across inbound routing and outbound dialer scenarios.
- Engineered PowerShell automation to auto-restart core services, improving screen recording reliability from 65% to over 98% and eliminating daily failures across the entire 500-agent environment.
- Diagnose and resolve SIP-based telephony failures, including call routing breakdowns and DTMF errors, maintaining near-zero downtime for mission-critical contact center operations.
- Identified and resolved critical Genesys-CRM integration failures causing screen-pop breakdowns by tracing root cause to data mapping and timing mismatches, restoring full agent context delivery at scale.
- Configure outbound dialer campaigns (Preview, Progressive) and validate IVR-to-agent data flow integrity, ensuring campaign compliance and accurate customer context delivery.
- Built a Critical EFRM Campaign Monitoring solution using PowerShell, Webhooks, and Windows Server for proactive, real-time failure detection and instant alerting.
- Developed an Automated Troubleshooting Log Collection utility in PowerShell that gathers all required diagnostic logs in a single execution, reducing RCA and resolution time.
- Coordinate with client IT teams and Genesys global support to resolve critical production incidents through structured root cause analysis and permanent fixes.
- Designed and delivered an internal Genesys Cloud CX training curriculum for 25 junior engineers, covering IVR design, outbound campaigns, SIP telephony, and CRM integration.

Key Projects

NexCX.in – AI Technical Knowledge Platform (github.com/Vaibhav0832)

Built and maintain an AI-powered web platform offering technology troubleshooting guidance, an AI assistant, and enterprise utility calculators with a fast, responsive interface.

Critical EFRM Campaign Monitoring

Real-time monitoring solution using PowerShell, Webhooks, and Windows Server to proactively detect campaign failures and instantly alert support teams.

Automated Troubleshooting Log Collector

PowerShell utility that auto-captures and organizes diagnostic logs in one execution, significantly cutting issue diagnosis time.

Screen Recording Automation

PowerShell service-restart automation that lifted recording reliability from 65% to 98%+ across a 500-agent production environment.

Certifications

AWS Academy – Machine Learning & Cloud Foundations | HackerRank – Python & SQL | Udemy – Java Full Stack Development | Coursera – AWS S3 & Design Thinking for Innovation | Google Cloud – Security Operations

Education

B.Tech, Computer Science & Engineering — Malla Reddy University | 2020 – 2024 | GPA: 7.1

Intermediate (MPC) — SR Junior College | 2018 – 2020 | GPA: 76.1%

SSC — Vijay High School | Passed 2018 | GPA: 9.2
